

Z-movement Bracket

for XY-travel Stands

Z-movement Bracket enables vertical (height) adjustment of the Digital Microscope over inspection object when extra diopter lenses are attached to the camera.

Working Distance of F and U series Digital Microscopes can be adjusted by 115mm without changing vertical position of the stand rail using Z-movement Bracket.

Made of high quality anodized aluminum and Stainless Steel parts.

Specification:

Z-travel range	115 mm
Adjusts WD for Diopters	+1, +2, +3 and +5
Size and Weight	170x34x15mm, ~ 175 g.
