

Release Notes for INSPECTIS© CAP Pro Version 6.2.17 through 6.3.2

New:

1. Grid overlay is made moveable across the image filed.
2. A small circle is added to the centre of the grid overlay.
3. Changing Font of Measurement Text under Preferences also updates font size of the displayed Rectangle and Grid size text.
4. Software is tested and approved for Windows 11.

Improvements:

1. Quick help is improved.
2. Database connection stability is improved.
3. Background colour for the editable category names under capillary preferences is change to white.
4. Auto-display of capillary image thumbnails by hovering the mouse cursor over the follow-up examination button is improved.

Bugfixes:

1. Measurement table was not displayed when counting objects executed.
2. Reset rectangle to original position changed rectangle size to 1x1mm. Current size of the rectangle was not kept.
